## PROJECTS

### Decision Jam

*Decision making and voting app.*

React, Express, Node, and MongoDB.

- A one month project where I collaborated with two other members to come up with the design and implementation. I primarily worked on the front end using React and CSS to design the UI and overall styling as well as integrating the Stripe payment method.

### Tagalog Flashcards

*Flashcard app for learning Tagalog.*

React/Redux, Express, Node and MongoDB.

- I created a variation of the Leitner method to come up with an algorithm for how often a flashcard would be reviewed.

### Lantern Drop

*Language speed typing game for learning Japanese kana characters.*

Unity, C#, Illustrator

- Utilized Unity's built in physics engine to create moving objects for gameplay.

## EXPERIENCE

### Lambda School

*Computer Science: Nov 2017 – May 2018*

- A six month full-time program learning full stack development, computer architecture, computation fundamentals, and applied programming. Worked on assignments with classmates as well as creating my own personal website and projects.

### Hotwire Inc. (Expedia), San Francisco CA

*Associate GL Accountant, 2014 – 2016*

- Prepared monthly journal entries and reconciliations as well as assist the Oracle engineering team with system testing related to chart of accounts conversion and invoice approval workflow.

### Quinstreet Inc., Foster City CA

*Senior AR/Billing Associate, 2010 – 2014*

- Deferred revenue recognition and reconciliation for monthly general ledger journal entries. Along with cash application of wires, checks and credit card charges into Oracle system.

## SKILLS

HTML, CSS, Javascript, React, Redux, Express, Node, Unity, C#, MongoDB, Axios, Adobe Illustrator, Photoshop, InDesign,

## EDUCATION

### San Francisco State University
